

Aurora **safety** Solutions

scene safety

Scene safe is a term that EMT and EMS responders use to get a feel for their environmental safety, before they enter a situation. The reason this term is used is because it is simple to remember. When you think about it, there are rarely two smaller words used that can have as much meaning. "Scene Safety" means that you have to be aware of the safety issues, correct them and "do the right thing", by holding your teammate accountable.

How does this apply to Aurora? The more we hold ourselves and others accountable for safety, the more we benefit. Benefits may be seen fiscally through raises or bonuses, or by a healthier, safer work environment. Believe it or not, we have more control over costs to our company than we give ourselves credit for. We can play a huge part in whether or not Aurora is profitable, just by making our "Scene Safe." So while at your work site, keep these checklists in mind to help you focus on safety.

Environmental Safety	Behavioral Safety	Driver Safety
✓Stop and assess Scene Safety!	✓Stop and assess Scene Safety!	✓Stop and assess Scene Safety!
✓Wet spots wiped up immediately?	✓Is there anything near that can hurt me?	✓Defensive driving skills.
✓Rubber backed rugs flipped over?	✓How should I help this person?	✓Remain calm.
✓Lid on while cooking?	✓What is the BSP?	✓Take your time.
✓Hand towels away from stove?	✓How would I feel about what is being said?	✓Stay off your phone.
✓Salt and sand spread on icy areas?	✓Give space.	✓Have a G.O.A.L of not getting into an accident.

Taking one second to assess Scene Safety will be the difference between getting into an accident and staying safe. Say something about Scene Safety to your coworkers, if you see safety issues. You are just as responsible for safety as they are. "Do the right thing" and make sure the scene is safe at all times.
